PROFIL

Full-Stack Developer with experience in web and mobile application development using **JavaScript, React, Next.js, Vue.js, TypeScript, PHP (Laravel) and Java**. Experienced in **building e-commerce applications, websites, IoT monitoring systems and database-driven applications, from requirements analysis through to deployment**. Accustomed to working in a team and committed to writing scalable, testable code that meets deadlines. Ready to contribute in a remote working environment to the development of high-quality applications.

Some of the standout projects I have worked on include:

- **The “PerpusDig” website and mobile app**, a mobile and web-based digital library application developed for the Nganjuk Regency Archives and Library Department.
- **The “GreenTrack” website and mobile app**, an application for tracking seedling and timber data under the auspices of the Nganjuk Perhutani Forest Management Unit.
- **“StarFlow” Starfruit Monitoring and IoT Sorting Website**, a web-based monitoring application and an IoT-based starfruit sorting tool based on ripeness levels.
